Ask 3 Critical Questions

For every web page that a visitor will see:

1. What action needs to be taken?
2. Who needs to take that action?
3. How do we persuade that person to take the action we desire?

What do you measure?

- Metrics or KPIs (Key Performance Indicators)

- Lead Generation

- Number of leads, conversion rate, sign-ups, referrals, quotes, demonstrations, downloads...

- Online Sales or Ecommerce

- Revenue, orders, profits, conversion rate, revenue or profits per visit, average order value...

What to report?

- Measure KPI's periodically using web statistics or analytics
- Record and track results over time and across changes
 - Track progress using trends
 - Use reports to simulate refinements and improvements over time

Analyse Results

- Impact of web refinements on results
- Monitor trends toward your objectives
- Determine ROI (Return on Investment)
- Perform Path Analysis
- Perform Scenario Analysis

Optimise and Test

- Identify incremental changes that work
- Combine and implement
- Test, test & test
- Optimise improvements
- Significant impact to the end result

Innovate

- Seek new ways to improve results
 - Keep on top of developments
 - Brainstorm ideas
 - Secure feedback
- Ensure changes made can be measured
 - Test new innovations and web refinements
- Incremental progress
